

Applicant: Chen et al.

Art Unit : 1637

Serial No.: 09/722,544

Examiner: Cynthia B. Wilder

Filed.

: November 28, 2000

Title

: METHODS OF 是IAGNOSING NEUROPSYCHIATRIC DISORDERS

Commissioner for Patents ⁹ Washington, D.C. 20231

RESPONSE

In response to the action mailed July 19, 2002, please amend the application as follows.

In the specification:

Please replace the paragraph beginning at page 10, line 5 with the following rewritten paragraph:

The term "allelic variant of a polymorphic region of an HKNG1 gene" refers to a region of an HKNG1 gene having one of several nucleotide sequences found in that region of the gene in other individuals, as well as to polypeptides encoded by nucleic acid molecules comprising said sequences.

Please replace the paragraph beginning at page 10, line 30 and continuing on page 11 with the following rewritten paragraph:

A "delivery complex" shall mean a targeting means (e.g., a molecule that results in higher affinity binding of a gene, protein, polypeptide or peptide to a target cell surface and/or increased cellular uptake by a target cell). Examples of targeting means include: sterols (e.g., cholesterol), lipids (e.g., a cationic lipid, virosome or liposome), viruses (e.g., adenovirus, adeno-associated virus, and retrovirus) or target cell specific binding agents (e.g., ligands recognized by target cell

CERTIFICATE OF MAILING BY FIRST CLASS MAIL

I hereby certify under 37 CFR §1.8(a) that this correspondence is being deposited with the United States Postal Service as first class mail with sufficient postage on the date indicated below and is addressed to the Commissioner for Patents, Washington, D.C. 20231.
